Disclaimer

- Dimensions, capacities and abilities apply to standard vehicles.
- Actual consumption will vary with vehicle loading, driving style, climatic and road conditions.
- This information was effective as at 01 August 2020 valid for model year 20 and is subject to change without notice.

*100km/h speed limit for goods vehicles over 3 500kg GVM < 9 000kg GVM was gazetted into law 11 Nov 2016 under Regulation 293. Refer to Government Gazette No 40420 of 11 Nov 2016. Regulation 215 of the Regulations is hereby amended by the substitution for subregulation (1A) of the following subregulation "(1A) No person shall operate a- a) minibus; b) midibus; c) bus, or d) goods vehicle with the gross vehicle mass of which exceeds 3 500 kilograms, first registered after 1 December 2016, unless such minibus, midibus, bus or goods vehicle is fitted with a speed governor, restricting the speed of such motor vehicle to the speed limits as contemplated in regulation 293."**Fuel consumption and CO₂ emissions values were obtained in accordance with the prescribed uniform measuring standard (SANS 20101: 2006 / ECE R101: 2005 in its currently applicable version). The verified values do not apply to a specific vehicle and do not constitute part of the product offer. They are provided solely for the purposes of comparison between different vehicle models. Because of the need to maintain strict comparability of results achieved by the standard tests, they cannot be fully representative of real-life driving conditions. Variations in driving styles and in road, vehicle and ambient conditions, will have a bearing on the results achieved on the road. For these reasons, consumption achieved on the road will not necessarily accord with these verified values. Based on lightest variable (no options) and 90% tank filling. Weight may vary depending on options fitted to vehicle. All diesel vehicles require low sulphur grade diesel of 50 ppm or lower.

Built for the **toughest jobs**

Volkswagen Commercial Vehicles understands that time is money and your business needs a vehicle that you can rely on; a vehicle that can handle the pressures of doing business in the most flexible and economical way.

By combining rugged versatility, cutting-edge engineering and a business-orientated approach, the Crafter is the ultimate transport solution.

Offering reliability, durability and adaptability all rolled into one package with the efficiency to match, the Crafter is practically tailor-made for your requirements. Its robust nature can cope with the most taxing road conditions and the fuel-efficient, economically friendly TDI engine makes it perfectly suited to the transportation demands of the typical South African business.

Take it all the first time

Industrious and dependable, the Crafter is your ultimate business partner. With its 75 litre fuel tank, sturdy frame and generous loading capacity, the Crafter will deliver no matter what. Boasting a loading capacity ranging between 9.9 m³ and 17.5 m³, the Crafter can handle any load thrown at it.

With one of the longest loading spaces in its class of up to 4.6m, you'll never have to leave anything behind.

Loading and unloading from the back is made easy through two rear wing doors or through the left-hand side 1.3 m wide sliding door. For even more convenience, a sliding door is optional for the right-hand side as well.

The flexible and practical nature of the Crafter makes it suited to a variety of applications. With a payload capacity of up to 2.5 tons and torque of up to 340 Nm, even the heaviest loads feel light. The Crafter is available in a 3.5 ton GVM version and a 5.0 ton GVM version. Choose between two wheelbases – 3,640 mm or 4,490 mm – three body lengths and three different roof configurations. So no matter what your business or how tough the job, the Crafter offers the perfect solution to meet your transportation requirements.

Please note:

- 1) Equipment can result in an increase/decrease in the unladen weight and consequently affect the payload.
- 2) Depending on the equipment, the front axle load limit may increase to 1,800 kg. This can affect the minimum payload.
- 3) Depending on the equipment, the rear axle load limit may increase to 2,000 kg. This can affect the minimum payload.
- 4) There is no factory provision for a specific roof load on vehicles with a super-high roof.

The payloads listed have been established allowing for factory options or other tailored solutions that are not included in the standard scope of delivery and services. The actual payload of a vehicle, which is calculated by the difference between the gross vehicle weight and the curb weight, can only be established by weighing the individual vehicle.

Built with **perfection in mind**

Attention has been given to every detail in the Crafter to ensure the comfort and safety of the driver and passengers. The cab ergonomics have been enhanced to ensure higher levels of practicality and ease of use in order to support the crew in their challenging work day. Improvements include robust seat upholstery for durability, a revised instrument cluster and control panel as well as plenty of storage compartments for a professional workspace.

The cab climate is easily controlled with a fresh air ventilator including air recirculation and heating as standard.

Other standard interior features include power-steering, heat-insulating glass, electric windows, radio preparation and door pockets.

Optional features include a radio/CD player, semi-automatic Climatic® airconditioning system, front reading lights and cruise control. All of these features have been built into the Crafter for your comfort and convenience, which means that you'll be more productive and able to give your business all the attention it deserves. Sporting the Volkswagen design DNA with its broader radiator grille, dominant headlight clusters and proud Volkswagen emblem – the Crafter looks every part as professional as it performs.

The safest choice

Safety is of the utmost importance to Volkswagen Commercial Vehicles and that's why the Crafter has been fitted with innovative safety features designed to deliver all-round protection. Essential safety systems such as ESP (Electronic Stabilisation Programme) combined with Brake Assist and Crosswind Assist, MCB (Multi-Collision Braking), TCS (Traction Control System), and EBD (Electronic Brake-force Distribution) are all standard in the Crafter.

Whether you're moving people, cargo or both, the Crafter works hard to keep them safely and securely on the road with a driver and passenger airbag as standard, three-point seatbelts, remote-controlled central locking and an optional anti-theft alarm.

The Crafter is fitted with a full metal partition without a window, which separates the cab from the freight in the load compartment.

The load area of the Crafter has also been equipped with lashing eyes as standard so your load can be secured using tie-down belts. The lashing eyes have a strong retention force of 500daN(kgs). There are 10 lashing eyes in the medium wheelbase version of the Crafter, 12 lashing eyes in the long wheelbase and 14 standard lashing eyes in the long wheelbase with extended rear overhang. Two of the foldable lashing eyes are located in the B-pillars. The Crafter also offers handy driver assistance systems as optional. These include Park Assist and Trailer Assist, which automatically steer the Crafter to parallel park or reverse-park your trailer, and Park Distance Control with proximity sensors. With all of this at your disposal, buying the Crafter is truly one of the safest decisions you can make.

Save as **you drive**

The success of a business depends on the bottom line and with the Crafter you get value for money right from day one. Service intervals of 20,000 km will significantly lower running costs and the Crafter's outstanding reliability will avoid expensive downtime.

State-of-the-art diesel engines optimise fuel consumption and reduce wear and tear, which makes it look as good on the balance sheet as it does on the road. The Crafter is backed by a 2-year unlimited mileage warranty, including a 12-year anti-corrosion warranty – a real vote of confidence given the long distance demands placed on business vans. Top quality workmanship and the long service life of the Crafter also ensure a competitive resale value, which means that it pays its way right up to the last day.

Crafter

When size does matter

Crafter 35 Delivery Van medium wheelbase with normal roof

Crafter 35 Delivery Van medium wheelbase with high roof

Crafter 50 Delivery Van long wheelbase with high roof

Crafter 50 Delivery Van long wheelbase with super-high roof

Crafter 50 Delivery Van long wheelbase with overhang and high roof

Crafter 50 Delivery Van long wheelbase with overhang and super-high roof
